### Work History

- #### Full-stack Programmer at Canary Tech

November 2018 - December 2021 | 3 years

Canary tech is the parent company of parapay, a fintech startup.

  - Collaborated with a team of five developers in building the fintech app.
  - Developed Web API backend using Node.js.
  - Integrated with Twillo for email and SMS notifications.
  - Developed Admin front end using react and redux-saga for state management

The product has handled more than 10 billion naira in transactions leading to revenue growth.
- #### Full-stack Programmer at Midleman

March 2021 - December 2021 | 9 months

Midleman is a med e-commerce start-up that provides healthcare products to hospitals, pharmacies and individuals.

  - Developed the software architecture blueprint that guided the rest of the team.
  - Built core backend functionalities which include business logic that satisfied the founder's description.
  - Worked with services like Paystack, AWS, and Nodemailer.
  - Built part of the front-end using React, Tailwind CSS, and Redux-saga.

The product has substantially bridged the gap between drug supplies and hospitals. It is projected to provide quality and certified health products to millions of individuals, five thousand hospitals, and pharmaceutical stores across the southern part of Nigeria.
- #### Full-stack Blockchain Programmer

January 2022 - now | 5 months

Omitch is a casino game start-up on the blockchain

  - Responsible for the full cycles of the blockchain development which include writing smart contracts, writing tests, and integrating ABIs to frontend.
  - Converted casino business logic to code.
  - Integrated games from a gaming provider
  - Worked with Hardhat, Mocha, Chai, Ethers, and Web3js.

### Education

December 2017 - December 2021  
**Nnamdi Azikiwe University**  
BSC in computer science
