MERN stack developer and blockchain programmer. My core interest in tech is in the blockchain and AI. Currently, I am building a library to make in-app registration of ENS names possible. Most weekends, I solve algorithms, play chess and do side projects. I will thrive in an environment that often pushes the limit of what's achievable.

Technical Skills

Node.js	4 years
React	4 years
Solidity	3 years
Typescript	4 years
Redux	4 years
MongoDB	4 years
React native	2 years
Nextjs	2 years

Additional skills:

Ethers | 3 year   Firebase | 4 year   Blockchain | 3 year   MySQL | 2 year

Hardhat | 3 year   Truffle | 3 year   Web3.js | 3 year   Express.js | 4 year

TailwindCss | 3 year   AWS | 3 year   Docker | 3 year   Postgresql | 2 year

Work History

Frontend Programmer at Canary Tech
December 2019 - December 2021 │ 2 years

Canary tech is the parent company of parapay, a fintech startup.

- Collaborated with a team of two developers in building the fintech app.
- Integrated Web API's to frontend Applications.
- Worked with Chakra UI, Sass, Redux-saga.
- Developed Admin front end using react and redux-saga for state management

The product has handled more than 1 billion naira in transactions

Full-stack Blockchain Programmer at Omitch
January 2022 - June 2022 │ 6 months

Omitch is a casino start-up on the blockchain

- Responsible for the full cycles of the blockchain development which include writing smart contracts, writing tests, and integrating ABIs to frontend.
- Converted casino business logic to code.
- Integrated games from a gaming provider
